EU PROJECTS

Web platforms

HT Apps has been developing user-friendly **web apps** for European projects, companies and freelancers since **2004**. HT Apps' web apps are responsive, accessible and secure. Designed according to the clients' guidelines, they offer a variety of functions. More than 20 years of expertise has also led to the development of proprietary software, such as the **ULOI** data interchange module for monitoring learning objects within **LMSs** and the **JOBy Attendance Tracking App** for virtual timekeeping.

Serious games

VITECO, founded in **2004**, develops **serious games** throughout Europe for universities and training organisations. These are **educational video games** designed to improve learners' skills such as problem solving and decision making. VITECO believes in **gamification** and follows its customers throughout the entire process: from the conception to the realisation of the video game.
