engineering

Company profile

SOFTWARE HOUSE SPECIALISED IN RESEARCH PROJECTS THAT DEVELOP APPLICATIONS RELATED TO ENVIRONMENTAL TECHNOLOGIES

IPPO Engineering is a software house focused on applications related to the environment, marine economy, renewable energy and energy efficiency and is active since 2004.

ENVIRONMENTAL TECHNOLOGIES AT THE SERVICE OF THE MARINE ECONOMY

IPPO Engineering, with its research and development activities for the marine economy, supports the implementation of:

- ~ sensors to improve the conditions of the marine ecosystem;
- ~ robotics, virtual reality (VR) and augmented reality (AR) to improve maritime business performance.

RESEARCH AND DEVELOPMENT ON RENEWABLE ENERGY AND ENERGY EFFICIENCY

IPPO Engineering supports research and development projects related to renewable energy and energy efficiency. One of its activities concerns the geothermal energy plant for the municipality of Letojanni in the province of Messina.

IPPO Engineering was partner in the STEP-2-SPORT project concerning energy efficiency and renewable energies used in sports buildings in order to implement the Nearly Zero Energy Building (NZEB) for the reduction of energy demand and the promotion of renewable energies.
